FDD Abstract of [REDACTED]

INFORMATION ON OPERATIONS AND PRODUCTION OF ELECTRICAL AND TELECOMMUNICATIONS PLANTS

25X1X

(8 pp; English/German; [REDACTED])

25X1A

25X1A

Comment: The following translations are suggested for abbreviations: 1) Para. 2, (a), Anlagenbau /Installations-Construction/ for AB; 2) Para. 3, (vi), Zentrales Laboratorium fuer Fernmeldetechnik /Central Laboratory for Telecommunications/ for ZLF; 3) Para. 3, (xvi), Apparatefabrik Treptow of SAG Kabel /Treptow Apparatus Factory, belonging to Soviet Corporation for Cable Production/ for AT; 4) Para. 4, (i), Traegerfrequenz /carrier frequency/ for TF, and Verstaerker-System /repeater system/ for V-System. It is further suggested that the "special production" referred to in para. 6 could be the cost of the Soviet laboratory which is said to exist inside the Koepenick Radio Plant.

This document is a mimeographed report, written in English but containing many German titles and terms, which consists of extracts from the minutes of meetings, [REDACTED] of the directors of VEB's (People-Owned Enterprises) engaged in the manufacture of electrical apparatuses and telecommunications equipment. Information given on these plants includes:

1) VEB Hennigsdorf Locomotive and Electrical Products Plant, belonging to the VEM (VVB for Electrical Machine-Building): Deutsche-mark value of planned 1952 production.

2) VVB RFT (Federation of People-Owned Enterprises for Radio and Telecommunications): Proposed Soviet inspection of the Leipzig Environment Plant and the AB Rostock; closing down of Friedrichshagen Equipment Plant and transfer of production to Stern-Radio, Berlin; cadmium procurement bottleneck at the Grossraeschen Rectifier Plant.

3) VEB Treptow Telecommunications Plant, RFT: Fulfillment of production quotas and the deliveries of electrical and telecommunications equipment, including radio sets, various types of private-branch-exchange switchboards (Nebenstellenanlagen); operators' telephone sets (Sprechzeuge), relay double-pole switches (Relaisdoppelpolwechsler), remote-control switches (Fernschaltgeraete), and relay strips (Relaisschienen).

4) VEB Leipzig Telecommunications Plant, RFT: Discussion of [REDACTED] output 25X1A planned August 1951 production of carrier frequency telephone apparatuses, such as signal relay-unit racks (Rufrelaissatz-Gestell), fuse racks (Sicherungsgestell); telephone sub-exchanges, such as lamp switchboards (Gluehlampenschrank); telecommunications equipment components; special accessories for telecommunications and measuring equipment.

5) VEB Chemnitz Equipment Plant, RFT: Detailed list of planned August 1951 production, with comments entered for most of the items specifying bottlenecks, delays, possibilities for completion of orders, etc.

6) VEB Koepenick Radio Plant, RFT: Export of spectrometers to the USSR. Provisional plans for 1952 production and investments.

25X1A 7) VEB Erfurt Radio Tube Plant, RFT: List of number and types of receiver valves and anode valves on backlog orders as of [REDACTED]; remarks are entered after each type of receiver valve listed, indicating cause of production delays, when backlogs are to be eliminated, etc.

8) VEB Neuhaus Radio Tube Plant, RFT: Output of radio valves and technical amplifier valves provided for in the 1952 provisional production plan.

/Foreign language document or microfilm of it [REDACTED] is available from CIA 25X1A, ext. 3505.7
